Software Version 1.0

User Guide Revision 1.0

March, 2008

## Disclaimer

We have reviewed this manual thoroughly. All statements, technical information and recommendations in this manual and in any guides or related documents are believed reliable, but the accuracy and completeness thereof are not guaranteed or warranted, and they are not intended to be, nor should they be understood to be, representations or warranties concerning the products described. Further, we reserve the right to make changes to the information in this manual at any time and without notice and without obligation to notify any person of such changes.

## **Licence Agreement**

You should carefully read the following terms and conditions before using the Floating Action Button software ("the software"). Your use of the software indicates your acceptance of this license agreement and disclaimer of warranty.

By installing and using Floating Action Button on your server, you agree to the following terms and conditions:

Floating Action Button source code may be altered (at the owners risk), but the software (altered or otherwise) may not be distributed to entities beyond the license holder without the explicit written permission of WebCodeTechnology.com.

All Floating Action Buttons copyright notices within the software and documentation must remain unchanged and visible.

Registered users may modify the Floating Action Button code for their personal use (at their own risk), but any altered code must not be redistributed or resold in any form.

If any terms are violated, WebCodeTechnology.com reserves the right to revoke the license at any time. No license refunds will be granted for revoked licenses.

License fees are non-refundable. Refunds, when granted, will be at the sole discretion of WebCodeTechnology.com.

## **Disclaimer of Warranty**

**THIS SOFTWARE AND THE ACCOMPANYING FILES ARE SOLD "AS IS" AND WITHOUT WARRANTIES AS TO PERFORMANCE OR MERCHANTABILITY OR ANY OTHER WARRANTIES WHETHER EXPRESSED OR IMPLIED.**

**WebCodeTechnology is not liable for the content of any message sent using Floating Action Button.**

**The user must assume the entire risk of using the program. ANY LIABILITY OF THE SELLER WILL BE LIMITED EXCLUSIVELY TO PRODUCT REPLACEMENT OR REFUND OF PURCHASE PRICE.**

# Welcome to Floating Action Button

Thank you for choosing Floating Action Button to improve your sales pages. This guide will help you install your new software.

## Getting Help

If you require help with using, installing or getting the best out of Floating Action Button then login into your member's area at [www.FloatingActionButton.com](http://www.FloatingActionButton.com) and use the "Contact Us" menu option.

## What files you should have received

You will have received a zip file named **fab.zip** this contains the following files.

**FABInstallationGuide.pdf** - The document you are now reading.

**fab/fab\_script.js** - The Floating Action Button Script file.

**fab/fab\_script.css** – The Floating Action Button Style sheet.

**fab/fab\_btnimg-x.png** – The Floating Action Button Image you choose.

## Installing Floating Action Button

In the file you received, named **fab.zip**, you will find the necessary files to use Floating Action Button. You will need to install these files onto the same server where your Sales Page resides. The following instructions will guide you through these steps.

### Before you begin

1. You will need a copy of the Floating Action Button zip file (fab.zip).
2. You will need unzipping software such as WinZip.
3. You will need an FTP client such as AceFTP, WS\_FTP or CuteFTP.

### Unzip contents to local hard drive

Use your unzipping software to unzip the Floating Action Button zip file into a temporary folder on your PC. Make sure you select the option to use folder names or preserve directories when unzipping. If the unzip is successful, your temporary folder will contain this folder.

- fab

### Setting up the 'fab' directory

In the public part or home of your web space (usually the directory is called 'public\_html', 'public', 'html', 'htdocs' etc), create the following directory. There is no need to change any of the default permissions. In this example, we assume your public html directory is 'public\_html'.

- public\_html/fab

## Transferring files to your web server

Using your FTP client, upload all the files from the local fab directory into the corresponding fab directory on the web server. We assume that your public html directory is 'public\_html'.

Local Computer Directory	Web Server Directory	Transfer Mode
fab	public_html/fab	BINARY

**Congratulations - installation is complete!**

## Using Floating Action Button

Now that you have got Floating Action Button installed you will want to start using it. The following steps will detail how to integrate Floating Action Button into your splash page. We assume that you have installed the script into the default folder off the home page i.e. **public\_html/fab**.

Load your sales page into your favourite editor. Here is some sample HTML in the next section we will highlight the additions we have made by marking them yellow.

```
<html xmlns:v="urn:schemas-microsoft-com:vml" xmlns:o="urn:schemas-microsoft-com:office:office">

<head>
<title>FloatingActionButton.Com - Preview Page</title>
<style>
<!--
        BODY
        {
                font-size:0.69em;
                font-family:Verdana,Tahoma,Arial,sans-serif;
        }

.style1 {
        border-style: solid;
        border-width: 3px;
}
.style2 {
        text-decoration: underline;
}
.style3 {
        color: #FF0000;
}

-->
</style>
</head>

<body bgcolor="#000080" vlink="#0000FF">

<blockquote>
        <table id="table119" cellSpacing="0" cellPadding="20" align="center" bgColor="#ffffff"
style="width: 700px" class="style1">
        <tr vAlign="top" bgColor="#ffffff">
                <td borderColor="#000000" bgColor="white" style="border-style: solid; border-width: 1">_
```

## Adding the script code into your splash page

All you need to do is add the Floating Action Button script into your splash page. You do this by adding the following lines:

```
<link rel="stylesheet" type="text/css" href="/fab/fab_script.css">
<script type='text/javascript' src="/fab/fab_script.js"></script>
```

The best place to put this line is in the HEAD section of the HTML page. Here is our sample sales page with the Floating Action Button script installed.

```
<html xmlns:v="urn:schemas-microsoft-com:vml" xmlns:o="urn:schemas-microsoft-com:office:office">

<head>
<title>FloatingActionButton.Com - Preview Page</title>
<style>
<!--
        BODY
        {
                font-size:0.69em;
                font-family:Verdana,Tahoma,Arial,sans-serif;
        }
}
```

```

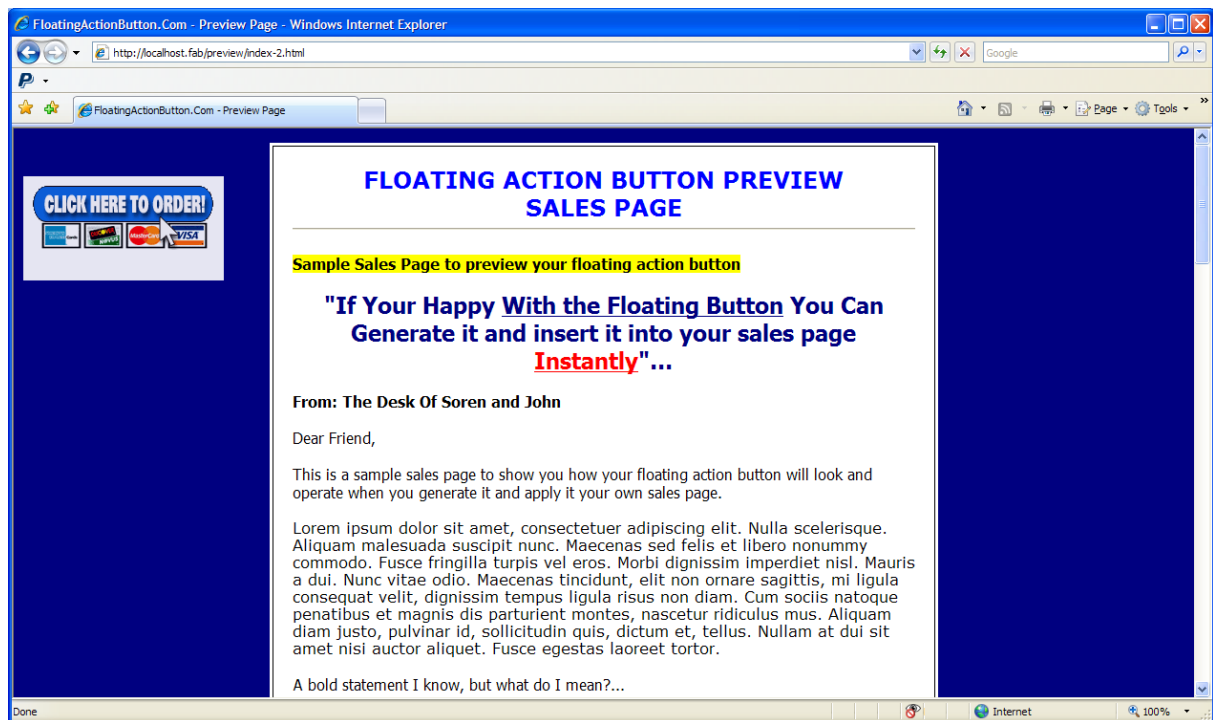

.style1 {
    border-style: solid;
    border-width: 3px;
}
.style2 {
    text-decoration: underline;
}
.style3 {
    color: #FF0000;
}
-->
</style>
<link rel="stylesheet" type="text/css" href="/fab/fab_script.css">
<script type="text/javascript" src="/fab/fab_script.js"></script>
</head>

<body bgcolor="#000080" vlink="#0000FF">

<blockquote>
    <table id="table119" cellSpacing="0" cellPadding="20" align="center" bgColor="#ffffff"
style="width: 700px" class="style1">
    <tr vAlign="top" bgColor="#ffffff">
        <td borderColor="#000000" bgColor="white" style="border-style: solid; border-width: 1">_

```

That's all there is to it, you will have to upload your changed sales page to your web server using FTP and then load it into your favourite browser and see the Floating Action Button in action.

## Advanced Installation

The following section details some advanced installation techniques that you can do with the Floating Action Button script.

### Installing Multiple Floating Action Buttons onto the same web site

If you wish to have more than one Floating Action Button on the same web site then you can do this by simply changing the folder name of each subsequent button you install. So install the first button as per the instructions above, then when you install each subsequent button change the name of the folder's accordingly **public\_html/fab1**, **public\_html/fab2** etc.

Then all you need to make sure is when you add the Floating Action Button script into your sales page you have an entry for each button you have installed and referencing the correct folder like this.

```
<link rel="stylesheet" type="text/css" href="/fab/fab_script.css">
<script type='text/javascript' src="/fab/fab_script.js"></script>

<link rel="stylesheet" type="text/css" href="/fab1/fab_script.css">
<script type='text/javascript' src="/fab1/fab_script.js"></script>

<link rel="stylesheet" type="text/css" href="/fab2/fab_script.css">
<script type='text/javascript' src="/fab2/fab_script.js"></script>
```

### Installing Floating Action Button into a sub-folder

If you wish to have the Floating Action Button installed into a sub-folder then this can also be achieved. Say for example you wish to have the button installed onto your blog and your blog resides in the **blog** folder off your website main folder. In this case you just need to install the script into the **public\_html/blog/fab** folder.

Then when you add the script to your blogs index page you just need to change the folder to reference the folder into which you have it installed, like this.

```
<link rel="stylesheet" type="text/css" href="/blog/fab/fab_script.css">
<script type='text/javascript' src="/blog/fab/fab_script.js"></script>
```
